

We don't hire smart people and tell them what to do.

We hire smart people so they can tell us what to do. (Steve Jobs)

FlowLogiX is an innovative startup rooted in Dresden. Emerging from the renowned University of Technology Dresden (TU Dresden), we are dedicated to developing cutting-edge software solutions that streamline automated in-house transport systems. Our mission? Navigating the complexities of intra-logistics in an increasingly digitalized world, harnessing the power of IoT, Industry 4.0, and artificial intelligence to deliver effective solutions.

To extend our dynamic team, we are currently seeking a

## **Working Student (f/m/d) Software Development**

### **Your role:**

- You'll assist in product or project development, helping to shape our monitoring and simulation software.
- You'll seize the opportunity to immerse yourself in practical experience, leveraging and broadening the knowledge you've gleaned from your university studies.

### **Requirements:**

- Good knowledge in Java, TS, or C# as well as a fundamental technical understanding
- Fluent in English, both spoken and written
- Self-reliant and responsible work approach
- Solution-oriented mindset

### **What we offer:**

- An exciting opportunity to take on challenging tasks with the latest technologies
- An open and dynamic international team culture at a modern workplace, flexible working hours, and of course the option for remote work
- Support for your personal and professional development
- The prospect of a long-term career with us following your graduation
